

Dr. Sudhir Waghmare is a Pune-based first-generation Entrepreneur and Innovator whose indigenously developed ventilators & life saving device has helped saved lives of thousands of Newborn babies not only in India but even in Austria, Australia, Poland, Russia, South Africa & in SAARC countries.

The new Adult & Paediatric ventilator Innovated by Shreeyash can be used as a regular ICU ventilator & can even address the COVID-19 situation.

The introduction of an Adult Ventilator is the latest in a long list of several life saving devices innovated by Dr. Sudhir.

For his work in developing A State of the Art Adult & Paediatric Ventilator, he was awarded as the Winner of the Innovate2BeatCOVID Grand Challenge by Marico Innovation with a grant of 43.5 lacs INR.

Dr. Sudhir believes that "It is not higher educational degrees but 'great ideas' that gives birth to innovation", and with each innovation, he aims to take a step towards revolutionizing healthcare technology in India.
